

DAILY DIARY

Company: Pinnacle Labs Pvt. Ltd. | Domain: Web Development | Internship Period: 25 May – 25 June
Projects: To-Do List Web Application and Scientific Calculator Web Application

Week	Day	Date	Project / Activity	Work Done / Learning
Week 1	1	25 May	Internship Introduction	Joined Pinnacle Labs Pvt. Ltd. and learned about the internship process, project requirements, and web development activities.
	2	26 May	Project Understanding	Understood the requirements of the assigned projects and revised HTML, CSS, and JavaScript concepts.
	3	27 May	To-Do List	Planned the To-Do List application and identified features such as adding, completing, and deleting tasks.
	4	28 May	To-Do List	Created the basic HTML structure, including the task input field, buttons, and task-list section.
	5	29 May	To-Do List	Designed the application using CSS and improved the layout, spacing, buttons, and overall appearance.
	6	30 May	To-Do List	Started implementing JavaScript functionality to add tasks dynamically to the webpage.
	7	31 May	To-Do List	Added functionality for completing and deleting tasks and tested the basic features.
Week 2	8	1 June	To-Do List	Tested task addition, completion, and deletion features and identified minor issues.
	9	2 June	To-Do List	Improved the user interface and checked the application's responsiveness on different screen sizes.
	10	3 June	To-Do List	Completed the major functionality and performed testing and debugging.
	11	4 June	To-Do List	Reviewed the HTML, CSS, and JavaScript code and made necessary improvements.
	12	5 June	To-Do List	Completed the final improvements and tested all major features of the application.
	13	6 June	To-Do List	Reviewed the completed project and learned from the development process.
	14	7 June	Scientific Calculator	Started planning the second project and identified the required calculator functions and interface.
Week 3	15	8 June	Scientific Calculator	Created the basic HTML structure, calculator display, and buttons.
	16	9 June	Scientific Calculator	Designed the calculator interface using CSS and organized the button layout.
	17	10 June	Scientific Calculator	Implemented basic arithmetic operations such as addition, subtraction, multiplication, and division using JavaScript.
	18	11 June	Scientific Calculator	Connected calculator buttons with JavaScript functions and tested different calculations.
	19	12 June	Scientific Calculator	Added and tested additional scientific mathematical functions.
	20	13 June	Scientific Calculator	Improved input handling and display functionality and tested different button operations.
	21	14 June	Scientific Calculator	Performed detailed testing of basic and scientific calculations and fixed minor issues.
Week 4	22	15 June	Both Projects	Reviewed both projects and improved understanding of JavaScript, DOM manipulation, and event handling.
	23	16 June	Scientific Calculator	Improved the calculator interface and made it more organized and user-friendly.
	24	17 June	Both Projects	Tested both applications and checked buttons, inputs, calculations, and task-management features.
	25	18 June	Both Projects	Reviewed and organized HTML, CSS, and JavaScript code and corrected errors.
	26	19 June	Both Projects	Worked on final improvements and checked the functionality and user experience of both applications.
	27	20 June	Both Projects	Prepared the final versions of the To-Do List and Scientific Calculator and performed testing.
	28	21 June	Both Projects	Reviewed the completed projects and documented important features and learning outcomes.

Week	Day	Date	Project / Activity	Work Done / Learning
Week 5	29	22 June	Final Testing	Performed final testing of both projects and corrected remaining minor issues.
	30	23 June	Project Finalization	Finalized the project work and reviewed the complete development process.
	31	24 June	Documentation	Organized project files and completed the final review and preparation for submission.
	32	25 June	Internship Completion	Completed the final project review and concluded the internship. Reflected on skills gained in HTML, CSS, JavaScript, UI design, debugging, and web development.

WEEKLY SUMMARY

Week	Main Focus	Outcome
Week 1	Internship introduction and To-Do List planning/development	Started and developed the basic To-Do List application.
Week 2	To-Do List completion and Scientific Calculator planning	Completed the To-Do List and started planning the Scientific Calculator.
Week 3	Scientific Calculator development	Developed the calculator interface and implemented its functionality.
Week 4	Testing and improvements	Tested and improved both projects.
Week 5	Final testing, documentation, and submission	Finalized both projects and completed the internship.
